

CONRAIL
Operation of MW
Telephone/Radio System
and
Radio Call Signs
for
Pittsburgh Division

JULY 1989

This manual is an instruction guide only and does not supersede operating or safety rules.

Names and occupations of individual employees maybe changed without prior notice as operations require.

OPERATION OF MW TELEPHONE/RADIO SYSTEM

Mobile To Base

1. Enter "*" plus access code for auto dial or "* *" plus access code for manual.
2. Immediately after acknowledgement tone, enter desired telephone number. Use a pause "#" after each smart access code (usually 8).
3. To disconnect base (hang up), enter "##" plus access code. Always disconnect when:
 1. Call is completed.
 2. Phone is not answered (between rings).
 3. A recording is received (between messages).

Base To Mobile

1. Dial phone number of desired base.
2. After ringing stops and access tone is received, initiate call using radio procedure (the radio transmitter is voice actuated).
3. When call is completed, disconnect radio by entering a pound sign (#) from the telephone set. Do not hang up the phone without entering a pound sign.

Automatic Disconnect Occurs When:

1. The mobile does not make a transmission for a period of one (1) minute.
2. The total time of the call exceeds three (3) minutes. (The mobile can extend this time by transmitting a "*" when the warning tone is received).

Remember

1. These are not private calls. Others are listening.
2. Mobile user, when initiating a call must inform the person on the phone that he or she is on the radio.
3. Use system sparingly as the same frequency is used for normal MW radio operations.
4. Outside line (9) or operator (0) calls are not available.
5. When mobile user initiates the call mobile user must (hang up). Enter "##" plus access code.
