SUPPORTED JOINT

SUSPENDED JOINT

NOTES:
1. Track circuit connections shown on this plan are typical for all types of track circuits where standard insulated joints, glued insulated joints, or no insulated are involved, except in third rail territory.
2. Whenever possible, use second-hand or brake hose for item 2 instead of using new hose. Minimum length required is 22'.
3. Applies only to installation of series overlay track circuit used with D.E.O.

CONNECTOR 9050-1
Material B assembly per AAR Spec. Part 112 & AAR drawing 1651.
Conductor type to be E163. Sleeve to be Nicopress 2367-J or equal.
Connector to be tinned per AAR Spec. Part 112.
